## Inserting SRS Information at TQI

### BACKGROUND

American Honda is supplying all owners of SRS-equipped vehicles with additional information about airbags. This information campaign has three components.

**Owner Information** – American Honda is mailing letters to all owners of SRS-equipped Acura vehicles. Included with this letter is a laminated card with information about airbags and occupant protection. The owner is requested to read the information, and put the laminated card in the glove box with the owner's manual.

**New Vehicles** – Starting on February 25, all new Acura vehicles coming off the production line will contain the following information:

- A warning sticker on the passenger's side of the dashboard.
- A reference label on the front side of the driver's and passenger's sun visors.
- A warning label on the back side of the driver's and passenger's sun visors.

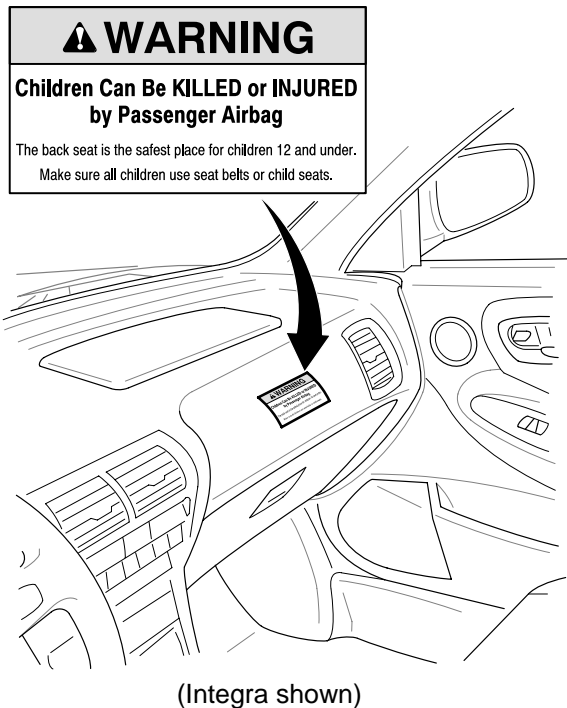

**Vehicles Currently in Inventory** – Unsold vehicles produced before February 25 require a dashboard sticker and a laminated card. These should be put in the vehicle during TQI. American Honda is sending all dealerships a supply of these stickers and cards.

### INSERTION PROCEDURE

1. Make sure you have the correct dashboard sticker and laminated card for the vehicle.
